

ARBIS Tokenomics

All bullet points underneath categories indicate a percentage of that category

Check the #announcements channel in Discord for information about when the following initiatives release.

Total Supply

50,000,000,000 ARBIS (total number of burgers eaten by Americans per year)

Circulating Supply:

10% of ARBIS supply will be circulating at launch.

5,000,000,000 – 10%

- 2,500,000,000 – 50% to NYAN Strategy depositors
- 2,000,000,000 – 40% to NYAN-ETH Strategy depositors
- 500,000,000 – 10% to NYAN Strategy compounders

Non-Circulating Supply:

90% of ARBIS supply will be non-circulating at launch.

45,000,000,000 ARBIS – 90%

- Liquidity Mining / Distribution Programs: 32,500,000,000 – 72.22%
 - Liquidity mining programs will reward those who deposit funds in the protocol.
 - Other various distribution methods will be considered.
- Team (Vested): 5,000,000,000 – 11.11%
 - Team funds will be vested linearly with a drip unlock.
 - 2,500,000,000 – 50% – vested for 26 weeks
 - 2,500,000,000 – 50% – vested for 52 weeks
- Treasury (Held in public Gnosis Safe): 7,500,000,000 – 16.67%
 - The treasury fund will be used for deploying new contracts, ecosystem development, future protocol incentives, and protocol upkeep.
 - Our treasury fund will always be transparently viewable and secured by a Gnosis Safe multi-signature contract.
 - At the time of launch, Gnosis Safe is not available on Arbitrum and we have instead opted for a custom time-locked multi-signature contract for unused supply.

Initial Distribution Chart

Liquidity Mining Program #1

The first liquidity mining program will span for approximately 2 weeks *following* the retroactive liquidity mining. 8,125,000,000 tokens (25% of the liquidity mining fund) will be distributed during this program, with allocations shown below. We may be adding more incentivized and non-incentivized strategies to Arbi's Finance during the duration of this program. The Pool 1 strategy allocation may not be fully utilized.

Pool 1 Strategies will receive up to 60% – 4,875,000,000 – of the allocated tokens.

Example allocations (to be determined at time of Pool1 liquidity mining kick off):

- NYAN-ETH SLP – 2.5% – 203,125,000
- NYAN Single Stake – 2.5% – 203,125,000
- WETH-MIM SLP – 5% – 406,250,000

To be added soon (if feasible):

- Additional Sushi Strategies
 - WETH-WBTC SLP – 5% – 406,250,000
 - WETH-SPELL SLP – 2.5% – 203,125,000
- Additional Swapr Strategies
- Aave single-staking assets
- Curve Strategies

Pool 2 Strategies will receive 25% – 2,031,250,000 – of the allocated tokens, split as follows.

- ARBIS-ETH SLP – 2,031,250,000

Pool 3 Strategy (stARBIS) will receive 15% – 1,218,750,000 – of the allocated tokens.

ARBIS Single Stake – 1,218,750,000

- The ARBIS single staking pool will also earn 75% of the ARBIS autocompounder fees, paid in WETH.

Timelock

ARBIS tokens are held in a multi-signature time-locked contract via Gnosis.

- Initial tokens in circulation:
 - 5B for team (vested 8 weeks)
 - 5B for initial distribution (retroactive liquidity mining)
 - 8.125B for Liquidity Mining Program #1

The contract requires 4/4 of its signatories to agree for funds to be withdrawn.

stARBIS

Description: stARBIS is the ARBIS token single staking pool and the heart of ARBIS Finance. This pool collects 50% of the autocompounder fees. Additionally, the Arbi's Finance protocol collects fees from each of its vaults and products. These fees are distributed to those who single-stake ARBIS within the platform via ETH. stARBIS holders (ARBIS stakers) receive % fees from everything in the Arbi's Food Court. Bon Appetit!

How to use: Stake your ARBIS tokens and receive stARBIS as a placeholder for your position! When in the stARBIS pool, your ARBIS automatically accrues platform fees, paid in WETH.

Fees:

- 10% early withdrawal fee, decaying linearly over 7 days.
 - 95% of the fee is redistributed to other stARBIS participants
 - 5% of the fee goes into the Arbi's Finance treasury
 - The withdrawal timer is reset every time new funds are deposited.

Utility of ARBIS token

Initially, the ARBIS token will be used to bootstrap liquidity in the Arbi's Finance platform through a liquidity mining incentive program which rewards platform users in ARBIS.

Governance and community-led initiatives are the primary long-term focus for the token, and will be coming!

****Our Tokenomics are a work in progress and are subject to change.****
